

MS Photo OÜ

It is a tandem effort between two creative people who have joined forces to help people who cannot independently study modern technologies.

Maria was born in and lives in Narva. She is a photographer, and has been engaged in photography life for over 10 years. Maria conducts many master classes in **"Beginner and Advanced Smart Phone Photography Course for Adults"** at the Narva Central library. After these courses, students readily participate in photo exhibitions and do not hesitate to create and publish a home photo archive.

Svetlana was born in Moscow, but lives in Narva. She studies modern technologies and always wants to share her own knowledge with people at her master-class **"Smart Phone Usage Course for Adults."** After these courses, the participants are no longer afraid of their gadgets and instead love working with them.
